

46th NEPCON Japan opens

46th NEPCON Japan opens today at Tokyo Big Sight.

This exhibition is the world's leading trade show for electronics manufacturing and mounting, and according to the promoter's estimate, nearly 100,000 visitors will come.

Our booth is in East 2 Hall (No. E8-18). We exhibit OLED lighting panel and its actual equipment, OLED lighting for microscope (by Daiichi Denki).

OLED is expected to be used for various industrial machine and inspection process because OLED is very thin, light and has soft light. We make aggressive presentations to these markets through this exhibition.

It will be a good opportunity to watch and touch our OLED.

We are looking forward to your visit.
